Pengalaman Pasien Hipertensi Terkontrol dalam Pengaturan Diet Hipertensi di Puskesmas Srondol Kecamatan Banyumanik Kota Semarang

(xix + 88 halaman + 7 tabel + 2 gambar + 7 lampiran)

Pengalaman pasien hipertensi dalam menjalankan diet hipertensi bukan merupakan hal yang mudah hingga dapat mengontrol peningkatan tekanan darah dan menjadi hipertensi terkontrol. Tujuan dari penelitian ini adalah untuk mendeskripsikan tentang pengalaman dan makna pasien hipertensi terkontrol dalam pengaturan diet hipertensi di Puskesmas Srondol Kecamatan Banyumanik Kota Semarang. Penelitian ini menggunakan metode penelitian kualitatif dengan *in-depth interview* dan pendekatan fenomenologis. Teknik pengambilan sampel dengan menggunakan metode *purposive sampling* dan jumlah informan sebanyak tiga pasien hipertensi terkontrol. Hasil penelitian menunjukkan bahwa pengetahuan pasien tentang hipertensi ditunjukkan dengan pernyataan tekanan darah yang tinggi daripada tekanan darah normal. Pelaksanaan diet hipertensi pada pasien hipertensi terkontrol yaitu diet rendah garam dan diet rendah kolesterol. Kepatuhan pasien hipertensi terkontrol dalam menjalankan diet hipertensi berasal dari dalam diri sendiri, dari keluarga dan dari keduanya. Hambatan yang dihadapi selama menjalankan diet hipertensi yaitu banyaknya hambatan dari luar pasien. Pola dukungan terhadap pelaksanaan diet hipertensi dari keluarga, dokter, perawat maupun tetangga. Cara mengatasi hambatan selama menjalani diet hipertensi dengan rutin kontrol tekanan darah dan melakukan perawatan hipertensi di rumah. Harapan pasien hipertensi terkontrol yaitu terus menjalankan diet hipertensi. Pasien hipertensi terkontrol dapat mengetahui jenis-jenis diet hipertensi selain diet rendah garam dan diet rendah kolesterol.
