

# Pencegahan Resiko Kebakaran Gedung: Peran dan Tindakan Pusat Layanan Kebakaran dan Pertolongan Département Rhone

Muhadi

## **ABSTRACT**

*Fire building is one of the urban problems. Risk of fire building is still a big enough threat for the population and economic activity. Based on statistical data, a fire at the Ministry of Rhône and French, in general, indicate that the number is big enough, and more than 80% of them occurred in residential buildings. The amount of fire cases is closely associated with the condition of the building and the performance of central fire service in perform fire prevention. To find out more comprehensive how the management of fire prevention at the Ministry of Rhone, the literature study needs to be done and observations (internship) in the field, inside the SDIS Rhone Group Prevention (Fire Service and Help Rhone Department).*
