ABSTRACT

Harbor is one of transportation supporter infrastructure of sea which is goods exit admission gateway inlet and outlet. Function and the role of harbor of vital importance in supporting transportation system for development a region. Region will grow if there are interinsular commercial activity from the region to other region so that happened improvement of investment of development and improvement of economic activity and commerce. Earnings from result of export will result growing it activity of local resident, transfer of capital and manpower, gain of eksternal and development of further region.

Geographically situation of the Labuan Uki Harbor is residing in the north coastal area of potential Bolaang Mongondow Regency to make balance and supports Bitung Harbor as main harbor in North Sulawesi Province for the agenda of supply of goods loading and unloading activities and requirement supply for the people in Bolaang Mongondow Regency and its surroundings. The chain of road Trans Sulawesi connecting Gorontalo Province and North Sulawesi Province to pass the Labuan Uki Harbor, so that development ought to of goods current admission exit from and to Labuan Uki Harbor very potential to be distributed to all region for the regional development agenda of Bolaang Mongondow region.

The issues found in Labuan Uki Harbor is how big the role of Labuan Uki Harbor to regional development happened in Bolaang Mongondow Regency and its surroundings. Condition of infrastructure and supporting facilities for the Labuan Uki Harbor this time is expected able to give amenity in the goods loading and unloading activities and shelf distribution to all region of Bolaang Mongondow Regency. Data applied is data about development of region Bolaang Mongondow Regency (time series), and indicator sectors of regional development.

Based on result of analysis found that simply loading and unloading activities in Labuan Uki Harbor influenced by inlet and goods outlet to other region. But activity volume still be limited because limitation of infrastructure and supporting facilities for the harbor activity. Its conclusion that present Labuan Uki Harbor doesn't have important role in regional development in Bolaang Mongondow Regency as a whole. Even though still there is sectors experiencing improvement caused by loading and unloading activities in Labuan Uki Harbor like wood outlet, tending to cocunut (copra) and fish experiences improvement. The recommendation is needing addition of harbor facility and amenity in doing goods outlet activity through of Labuan Uki Harbor to increase region economics wheel.
