ABSTRACTS

Poverty problem have causes disparity between west and east Indonesia area, as an effort to eliminate the difference of that, central government found 13 Kapet that expected can become Prime Mover for area of around him pass through what we called Trickle Down Effect (Spread Effect). One of the Kapet in east Indonesia area is Kapet Bima. In growth here in it seem's that investment at Kapet Bima very minim so that it is important to know " How Performance The Function of Kapet in Region Development in Sub-Province of Bima and whats factors influencing him"

*The Method using in this research are : Scoring, Factor analysis, SWOT analysis and Analitical Hirearchy Process (AHP) According to those analysis result which have been done Kapet Performance indicator are : Earnings Of Per capita, GDRP, Investment Value, Exporting Value, Human Development Index and GDRP Percentage of Industry sector. Performance of Kapet in regional development at Bima west nusa tenggara is **unsuccesfull** even disparity between Sub-Province in Province West Nusa Tenggara during range of time 1996-2003 progressively mounts. Performance influencing Factors of Kapet in Development of Region in Sub-Province of Bima are : Institute Performance of BP Kapet which not optimize yet in regional development of Kapet Bima (Sub-Province of Bima), Sub-Province of Bima imprecise as Growth Center, Lack of the siding from Local Government in supporting development of Kapet, Human Resource and low of bargain position of Pre eminent commodity (Natural Resources) and the last factor is Management of Kapet which still dominated by Central Government. and there are 8 strategy to develop Kapet Bima they are: Management Reform of Kapet , Promotion opportunities of investment, , Make-Up of regional facilities and infrastructure, Make-Up of Human Resource quality, Coordination between BP. Kapet with local Government , Optimizing Performance of BP. Kapet, , Make-Up of pre-eminent commodity quality and The Last Strategy is Transparency and Accountability of Kapet management. While chosen management alternative of KAPET by Analytical Hierarchy Process (AHP) is Decentralize Regionalization by Regional Management.*

*The conclusion of this research is Kapet Performance In Regional Development at Bima West Nusa Tenggara is **unsuccesfull** because influence by factors: : Institute Performance of BP Kapet which not optimally yet in regional development of Kapet Bima (Sub-Province of Bima), Sub-Province of Bima imprecise as Growth Center, Lack of the siding from Local Government in supporting development of Kapet, Human Resource and low of bargain position of Pre eminent commodity (Natural Resources) and the last factor is Management of Kapet which still dominated by Central Government. To solve that problem are recommended to do 8 strategy of Kapet Development, and it recommended to reform Management of Kapet with Bottom up approach pass through Decentralize Regionalization which Regional Management (RM) as the manager. More research about regional management in Kapet management Extending of Kapet area include sub province of sumbawa and More Research about Location criterion of Kapet. To complete this research it's also recommended to do the research with stakeholder involve in decision making,, Study of Kapet with larger area including Dompu and Bima City, Study of Kapet with Central government as a concepthor of Kapet and pay attention at data. accurating*
