## **ABSTRACTS**

*As the implication of inadequate the activity and effectiveness of the Air Sebakul Bus Station in Bengkulu where located in Kelurahan Pekan Sabtu, there are many Bus-pools (said, Terminal Bayangan) are operated in city center and had made the system of city traffic to be uncontrolled. The research problems found in this study is How the Performance of Air Sebakul bus station in Bengkulu Municipality for the development of its surrounding?*

*The purposed of this study is to evaluate and to actknown the effectiveness of Performance of The Air Sebakul bus station in order achieving the development of its surrounding in Bengkulu City.*

*The Analysis process done by Super-impose map analysis and Performance accountability analysis of the bus station and written by narrative description based on the data and existing condition.*

*The Study result are described that existences of the Air Sebakul bus station is unable as the main factors to generate the development growth to its surrounding, Recommendations are given such as, (1). Needs to increase the bus station management by increasing the law-enforcement on the Local Government Rules and had to the all bus operators (inner city bus and inter city bus) be concerned to make bus-pools around the bus-station indeed. (2). Revised the Land used the area of bus station and its surrounding in order to achieved the rapid development growth of Kelurahan Pekan Sabtu in Kecamatan Selebar, though center activity in the city center will be spread, and (3). Propose the extended study for improvement the services in regional pattern planning of the West-Line Inter Sumateran city ways as a supported activity to the intercity lane transportation.*
