**BAB I. PENDAHULUAN**

1.1 Latar Belakang Masalah..................1
1.2 Perumusan Masalah..........................3

**BAB II. TINJAUAN PUSTAKA**

2.1 Minyak Atsiri ..................................4
   2.1.1 Pengertian Minyak atsiri................4
   2.1.2 Minyak Jahe................................5
   2.1.3 Jahe dan Komposisinya...............5
   2.1.4 zingiberene ................................8
2.2 Asam sitrat ...................................8
   2.2.1 Definisi Asam Sitrat....................8
   2.2.2. Sifat-sifat Asam Sitrat..............9
2.3 Ekstraksi Cair-cair ........................9
2.4 Pengkelatan..................................9
2.5 Indeks Bias..................................10
2.6 Refraktometer...............................12
BAB III. TUJUAN DAN MANFAAT

3.1 Tujuan ........................................................................................................ 13
  3.1.1 Tujuan akademis................................................................................ 13
  3.1.2 Tujuan penelitian ........................................................................... 13

3.2 Manfaat ..................................................................................................... 14

BAB IV. PERANCANGAN ALAT

4.1 Spesifikasi Alat.......................................................................................... 15

4.2 Gambar dan Dimensi Alat......................................................................... 15
  4.2.1 Bagian Refraktometer........................................................................ 16
  4.2.2 karakteristik ...................................................................................... 17

4.3 Cara Kerja .................................................................................................. 17
  4.3.1 Prosedur kalibrasi 2 waj refraktometer......................................... 17
  4.3.2 Cara Kerja Alat ............................................................................... 18

BAB V. RANCANGAN PENELITIAN

5.1 Alat dan Bahan yang Digunakan............................................................... 19
  5.1.1 Alat yang Digunakan ....................................................................... 19
  5.1.2 Bahan yang Digunakan ................................................................... 19

5.2 Diagram Alir Cara Kerja........................................................................... 20
  5.2.1 Kalibrasi Refraktometer................................................................. 20
  5.2.2 Penentuan Indeks Bias Minyak Jahe............................................. 21

5.3 Cara Kerja ................................................................................................ 23
  5.3.1 Prosedur kalibrasi 2 waj refraktometer........................................ 23
  5.3.2 Penentuan Indeks Bias Minyak Jahe Murni................................. 23
  5.3.3 Penentuan Indeks Bias Minyak Jahe Dengan Pengkelat Asam Sitrat ................................................................. 24
5.4 Variabel Percobaan ................................................................................. 25
5.4.1 Variabel Tetap .................................................................................... 25
5.4.2 Variabel Bebas .................................................................................. 25

BAB VI. HASIL DAN PEMBAHASAN

6.1 Hasil Pengamatan ................................................................................ 26
6.2 Hasil Pengujian ..................................................................................... 27
6.3 Pembahasan .......................................................................................... 34
   6.3.1 Hubungan Konsentrasi Asam Sitrat dengan Indeks Bias.............. 34

BAB VII. PENUTUP

7.1 Kesimpulan ............................................................................................ 36
7.2 Saran .................................................................................................... 36

DAFTAR PUSTAKA ....................................................................................... 37
