TRACT:

le in third world countries, traditionally still relied on the extended family since the
nments fail to provide a comprehensive social security that supposedly serves as a
p to those in need. Triggerred by economic crisis in the 1998, for the last decades,
esian government, has initiated some welfare schemes to protect the people from
rophy. However, the policies have been generally incremental and fragmented. As
sequence, distinctions between state-sector and non-state-sector employees, as well
etween formal and informal workers still remain. Despite the Indonesian
titution (UUD 1945) clearly mentions that the establishment of the state of
esia was to promote the general people welfare, the government has not been able
nstruct a holistic policy to fulfill the objective. Statistical data showed that the
nment so far only able to protect the minority of the population, i.e the formal
ers, while the rest are still abandoned to live without adequate protection. My
 will examine the general policies of Indonesian government in providing social
re, identify the strenght and weakness of the policies, and provide some lessons
ed.
