KATA PENGANTAR

Di era pesatnya perkembangan teknologi saat ini, kunjungan ke perpustakaan tidak hanya dilakukan dengan mendatangi langsung ke perpustakaan, namun ada yang melakukan kunjungan secara *online*. Salah satu kunjungan *online* yang dilakukan oleh pemustaka adalah mengunjungi *website Diponegoro University Institutional Repository (UNDIP-IR)* dengan laman <http://eprints.undip.ac.id/>.

Terdapat 4 parameter kunjungan *online* yaitu:

1. *Page views* adalah jumlah halaman yang dilihat oleh *visitor*. Setiap *visitor* sudah pasti menghasilkan 1 *page view*. Jika 1 *visitor* membuka 4 tautan maka jumlah *page view* akan berubah menjadi 4 tetapi jumlah *visitor* masih tetap sama yaitu 1. Jadi, semakin banyak *visitor*, memungkinkan sebuah *website* mendapat banyak *page view*.
2. *Unique visits* adalah jumlah pengunjung dari satu IP dalam kurun waktu tertentu. Jumlah *unique visitor* merupakan indikator penting keberhasilan sebuah *website*. Semakin tinggi jumlah *unique visitor*, semakin besar pula potensi kesuksesan yang dicapai dari sebuah *website*.
3. *First time visits* adalah jumlah *visitor* yang pertama kali mengunjungi *website* tersebut.
4. *Returning visits* adalah jumlah *visitor* yang kembali mengunjungi *website* tersebut.

Berdasarkan data statistik dapat dilihat rata-rata kunjungan per bulan di *website Undip Institutional Repository* adalah sebagai berikut:

NO	TAHUN	JUMLAH KUNJUNGAN (<i>Unique visits</i>)	KUNJUNGAN PER BULAN
1	2016	2.955.820	246.318
2	2017	2.757.396	229.783
3	2018	2.241.763	186.813
Jumlah		7.954.979	220.971

Terlampir *screen shot* data kunjungan di *Undip Institutional Repository*.

Semarang, 31 Desember 2018
