Komponen Yang Dinilai	Nilai Maksimal Prosiding		Nilai Akhir Yang Diperoleh
	Internasional	Nasional	
	<input type="checkbox"/>	<input type="checkbox"/>	
a. Kelengkapan unsur isi prosiding (10%)	3,00		2,22
b. Ruang lingkup dan kedalaman pembahasan (30%)	9,00		6,67
c. Kecukupan dan kemutakhiran data/informasi dan metodologi (30%)	9,00		6,67
d. Kelengkapan unsur dan kualitas terbitan/jurnal (30%)	9,00		4,44
Total = (100%)	30,00		20,00

Nilai Pengusul = $40\% \times 20,00/3 = 2,67$

Catatan Penilaian artikel oleh Reviewer :

- Kesesuaian dan kelengkapan unsur isi prosiding:** Prosidingnya standar, ada editorial board, ISSN, web site, DOI dll. Tapi ini prosiding yang sangat gado-gado isinya, saya lihat associate editors nya tidak ada yang relevant dengan area dari artikel yang dengan judul di atas.
- Ruang lingkup dan kedalaman pembahasan:** cukup baik. Ada tujuh hypotheses yang diuji. Definisi variabelnya menggunakan sumber-sumber yang cukup komprehensif.
- Kecukupan dan kemutakhiran data/informasi dan metodologi:** Cukup baik. Menggunakan meted standar penelitian model survey dan hipotesisnya diuji menggunakan analisis statistik. Hanya saja hasil-hasil yang ditampilkan kurang komprehensif. Angka-angka hasil analisisnya harusnya ditampilkan secara komprehensif. Mungkin ada batasan halaman dari penerbitnya?
- Kelengkapan unsur dan kualitas terbitan:** Saya lihat jurnal ini memuat artikel yang luar biasa banyaknya. Topiknya dari a sampai z. Saya tidak terlalu yakin terhadap integritas akademik dari prosiding ini.

Nilai Pengusul = $40\% \times 20,00/3 = 2,67$

Catatan Penilaian papaperoleh Reviewer:

- Kesesuaian dan kelengkapan unsur isi prosiding:** Unsur isi paper sudah sesuai dengan petunjuk penulisan yang diberikan oleh conference, mencakup pendahuluan, kajian pustaka, pengembangan hipotesis, dan kesimpulan. Makalah ini juga telah berisikan unsur-unsur penting terutama pembentukan hipotesis. Namun belum ada bagian pembahasan.
- Ruang lingkup dan kedalaman pembahasan:** Makalah memberikan suatu pendekatan dalam mengembangkan hipotesis hubungan antara praktik manajemen rantai pasok hijau dan kinerja rantai pasok. Ada baiknya, diagram konseptual terlebih dahulu disajikan dan dilanjutkan dengan pembahasan untuk masing-masing hipotesis. Pemaparan untuk kontribusi penelitian belum begitu jelas.
- Kecukupan dan kemutakhiran data/informasi dan metodologi:** Jumlah referensi sudah cukup baik dan yang terbaru di atas tahun 2013
- Kelengkapan unsur dan kualitas terbitan:** Jurnal masuk dalam pengindeks SCOPUS dengan kategori Q4. Penerbit inderscience termasuk yang diragukan oleh DIKTI

Industrial Engineering, Diponegoro University, Jl. Prof. Soedarto, SH, Tembalang, Kota Semarang, Jawa Tengah, Indonesia

Abstract

• View references (111)

Based on literature review, this study proposed a conceptual model to measure impact of green supply chain management (GSCM) practice on the performance of the enterprise in the furniture industry at Jepara. The model attempts to explain how the performance outcome of GSCM practice is differently between enterprises which is depend on the type of GSCM practice and characteristics of an SME (product orientation and enterprise scale). This conceptual model consists of seven hypotheses. Three of hypotheses are about two type of furniture workshops category (indoor and outdoor furniture) and their effect on the GSCM practices and performance. Three others are about three kinds of scale of the enterprise of Jepara furniture (small, medium, and large) and their effect on the GSCM practices and performance. One hypothesis is about the interaction of two types of furniture workshops category (indoor and outdoor furniture) and three kinds of scale of the enterprise of Jepara furniture (small, medium, and large) and their effect on the GSCM practices and performance. To test the conceptual model empirically, this study plan to conduct in-depth interviews and design a fixed-choice question and handed directly to the owner of the enterprise of furniture as the respondent. © 2016 American Scientific Publishers All rights reserved.

Based on literature review, this study proposed a conceptual model to measure impact of green supply chain management (GSCM) practice on the performance of the enterprise in the furniture industry at Jepara. The model attempts to explain how the performance outcome of GSCM practice is differently between enterprises which is depend on the type of GSCM practice and characteristics of an SME (product orientation and enterprise scale). This conceptual model consists of seven hypotheses. Three of hypotheses are about two type of furniture workshops category (indoor and outdoor furniture) and their effect on the GSCM practices and performance. Three others are about three kinds of scale of the enterprise of Jepara furniture (small, medium, and large) and their effect on the GSCM practices and performance. One hypothesis is about the interaction of two types of furniture workshops category (indoor and outdoor furniture) and three kinds of scale of the enterprise of Jepara furniture (small, medium, and large) and their effect on the GSCM practices and performance. To test the conceptual model empirically, this study plan to conduct in-depth interviews and design a fixed-choice question handed directly to the owner of the enterprise of furniture as the respondent.

Mobile learning (m-learning) has become a quite significant factor in higher education. Mobile devices such as netbooks, tablets or smart phones have become ubiquitous in the institutions of higher education. Nearly all students nowadays own mobile devices and about half of them own more than one. In addition, because these devices are highly personalized and collaborative communication tools, they provide the institutions of tertiary education with flexible tools for complementing the existing technologies and extending the learning beyond the classrooms and homes from remote places like train or bus stations where students do not have any access to computers. Therefore, the aim of this article is to survey whether students of higher education are well equipped for mobile learning; to discover whether and how often these students use mobile devices for education, and for their school studies in particular; and to find out students' opinion on m-learning.

Korean education system follows a one-way model, where instructor introduces the lecture material with minimal discussion. This methodology makes it hard to get feedback from students regarding their understanding and their questions. In this paper we propose to use Twitter as a mean of feedback. After each class, students are asked to evaluate their percentage of understanding on a scale from 0 to 100. When the average percentage of understanding is below a pre-set threshold, 70% in this paper, or the number of questions is high, the class is repeated for one hour in the following week using an example-based material. Repetition improved the percentage of understanding of 41.25% of students between 0% and 10%, while the percentage of understanding of 53.75% of the students improved more than 10% after repetition. Besides, for each lecture, there was a student whose understanding increased by 60% after repetition. Besides, data showed a strong positive correlation between student's percentage of understanding and his/her final score. This finding can be used by instructors to offer students with low understanding a special treatment such as dedicated office hours in order to improve the overall percentage of understanding.

In our relentless effort to achieve global excellence, we have identified internationalisation as one of the key strategic thrusts. One of our key priorities is to recruit international students from our partner universities to undertake study abroad in our university. These students are important to us, as they will be our future unofficial ambassadors. Thus, enhancing their experience during short stints in Brunei is our main priority. In this paper, we not only discuss the support and services we put in place to attract these international students but also how we enhanced the international student's experience. We also identified common problems faced by the international students so that we can continually improve our services offered to them. It should be noted that enhancing international students' experience is an all-encompassing effort from the pre-arrival to post-departure. To address some of these common problems, we have put in place several notable support system such as '1-stop' student central, student-buddy system, 24-hour hotline, 'crash' courses in local customs and traditions and many more. To conclude, we discuss possible future initiatives to further enhance the international students' experience.

A public administration program involves more than just improving theory, bringing also a promise of greater organizational efficiency and effectiveness. They are also being implemented in developing and transitional economies and societies. Therefore, public administration programs should be evaluated in terms of their social equity rubrics and success of public services. Big issue in public administration doctoral programs is the learning and understanding of the lecturers who response in closing an oversize gap between the principles of public administration and reality. The purpose of this study was to evaluate the consistency of curriculum, course and strategic plan of a Public Administration Doctoral Program that emphasized social equity. In this study, the researcher used the questionnaire obtained information on the current status of curriculum and courses of the public administration doctoral program in the Faculty of Social Sciences and Humanities, Mahidol University, which intends to explain the factors that are related to its emphasis on the aspects of social equity rubrics. Data were collected by administering a questionnaire from the Board of Public Administration program who were managing/lecturing in the public administration doctoral program and the lecturers who had experience teaching in the public administration program in higher education for more than 10 years. The results showed that: (1) the program is fairly complete in its guidelines and principles, and has been thoroughly implemented under the guidelines and principles that were prescribed or specified at the outset; and (2) the program's strategic plan has been concerned with social equity, which is consistent with the vision of the Faculty of Social Sciences and Humanities at Mahidol University.
