Catatan Penilaian Paper oleh Reviewer :

1. Kesesuaian dan kelengkapan unsur isi paper:

Makalah ditulis rinci dan sistematis. Unsur isi artikel yang meliputi: Title, Abstract, Introduction, Materials and Methods, Results and Discussions, Conclusion, References telah sesuai dengan petunjuk penulisan. (nilai: 3,00)

2. Ruang lingkup dan kedalaman pembahasan:

Substansi yang disampaikan dalam artikel sesuai dengan ruang lingkup seminar/prosiding (Teknik Mesin pada keahlian Reliability) (nilai: 9,00)

3. Kecukupan dan kemutahiran data/informasi dan metodologi:

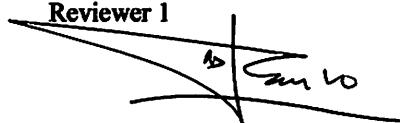

Artikel memberikan data hasil penelitian yang cukup baru. Kecukupan dan kemutahiran data yang disajikan oleh pengusul sudah sangat baik (Nilai : 8,50)

4. Kelengkapan unsur dan kualitas terbitan:

Artikel diterbitkan oleh AIP Conference Proceeding, terindeks Scopus, dengan SJR: 0,16 (2017). Artikel ini merupakan hasil dari International Conference On Advanced Materials Science And Technology (Icamst 2015) (nilai: 9,00).

Abstract

 [View references \(15\)](#)

Corrosion is an attack that occurs on a metallic material as a result of environment's reaction. Thus, it causes atmospheric storage tank's leakage, material loss, environmental pollution, equipment failure and affects the age of process equipment then finally financial damage. Corrosion risk measurement becomes a vital part of Asset Management at the plant for operating any aging asset. This paper provides six case studies dealing with high speed diesel atmospheric storage tank parts at a power plant. A summary of the basic principles and procedures of corrosion risk analysis and RBI applicable to the Process Industries were discussed prior to the study. Semi quantitative method based on API 581 Base-Resource Document was employed. The risk associated with corrosion on the equipment in terms of its likelihood and its consequences were discussed. The corrosion risk analysis outcome used to formulate Risk Based Inspection (RBI) method that should be a part of the atmospheric storage tank operation at the plant. RBI gives more concern to inspection resources which are mostly on 'High Risk' and 'Medium Risk' criteria and less on 'Low Risk' shell. Risk categories of the evaluated equipment were illustrated through case study analysis outcome. © 2016 Author(s).

PREFACE: 3rd International Conference on Advanced Materials Science and Technology (ICAMST 2015)

The 3rd International Conference on Advanced Materials Scence and Technology (ICAMST 2015) was held on the Grasia Hotel during 6-7 October 2015. This event is organized by Semarang State University (Unnes) and co-organized by Bandung Institute of Technology (ITB), Gadjah Mada University (UGM), Diponegoro University (Undip), and Sebelas Maret University (UNS). Semarang, the home of a major state university amid pleasant surroundings, was delightful place for the the third serie of ICAMST.

In this event, the conference was successfully carried out. More than 200 pre-registered authors submitted their works in the ICAMST 2015. The 156 presented papers preserved the high pledge recommended by the written abstracts and the programme was chaired in a professional and efficient approach by the session chairmen who were selected for their international in the subject. The selected papers amount of 106 are reviewed by reviewers from the whole world and edited by the reputable professors in the Universities of Indonesia Republic's Government and doctors inline with their expertises.

The committee has accepted fullpapers from Netherland, Egypt, USA, Korea, Japan, Malaysia, and Indonesia. The focus of this conference is to support Materials Research. Material Research Innovations covers all areas of materials research with a particular interest in synthesis, processing, and properties from the nanoscale to the microscale to the bulk. Coverage includes all classes of material – ceramics, metals, and polymers; semiconductors and other functional materials; organic and inorganic materials – alone or in combination as composites. Innovation in composition and processing to impart special properties to bulk materials and coatings, and for innovative applications in technology, represents a strong focus.

Organizing an international conference involves great energy to finish complex and substantial detail therefore we would like to express my gratitude to all members of ICAMST 2015 organizing committee for their sincere cooperation to hold this event. ICAMST 2015 would not be possible without our keynote speakers, presenters, reviewers, all participants and Semarang State University. We would like to thank for all support.

Prof. Dr. Sutikno, S.T., M.T.
Chairman of ICAMST 2015
