Abstract

This study aims to examine whether the Autoregressive Integrated Moving Average (ARIMA) model is appropriate to be applied in the Indonesia Stock Exchange, especially for the socially responsible investment stocks. For the ARIMA model combines the autoregressive and moving average methods, so it is viewed as a useful tool to predict the stock prices. Those methods are frequently used methods to forecast the stock prices. The data used in this study were daily SRI-KEHATI Index during the period of June 8, 2009 to July 17, 2017. The results showed that the daily SRI-KEHATI Index data were not stationary data, thus this data needed to be transformed. The transformation was done by using the first seasonal differencing transformation process. After being transformed, those data became stationary. Furthermore, this study found that ARIMA (3,1,1) was a model, which might be appropriate and fit with the data condition. This method was also relevant to be applied in the Indonesia Stock Exchange in order to forecast the stock prices. © The author(s) 2019.

Investment Management and Financial Innovations

Since 2019, the "Investment Management and Financial Innovations" journal is the Member (JMT13789) of the Committee on Publication Ethics (COPE). The Journal is open access and double blind peer-reviewed. It is published in English with quarterly frequency, in Sumy (Ukraine).

Aims and Scope

The international journal "Investment Management and Financial Innovations" encompasses the results of theoretical and empirical researches carried out both on macro- and micro-levels, concerning various aspects of financial management and corporate governance, investments and innovations (including using of quantitative methods). It is focused on the international community of financiers, both academics and practitioners.

Key topics:

- financial and investment markets;
- government policy and regulation;
- corporate governance;
- information and market efficiency;
- financial forecasting and simulation;
- financial institutions: investment companies, investment funds, investment banks, hedge funds, private pension funds;
- objects of real and financial investing;
- financial instruments and derivatives;
- efficiency of investment projects;
- econometric and statistic methods in project management;
- alternative investments;
- ratings and rating agencies.

Subject Area – Business, Management and Accounting. Subject Category – Business and International Management (1493); Strategy and Management (1428).
