Catatan Penilaian artikel oleh Reviewer :

1. Kesesuaian dan kelengkapan unsur isi jurnal:

Artikel dengan metode penelitian kuantitatif disajikan dengan memuat unsur yang terdapat dalam artikel jurnal. Title tergolong cukup menarik. Abstrak tergolong sistematis. Introduction sudah merangkum perkembangan riset terkini tentang pengalaman menyesuaikan diri dengan budaya yang berbeda. Method mengulas karakteristik partisipan dan desain. Result menyajikan beberapa kasus per kasus. Discussion menjelaskan dinamika psikologis antar variabel. Reference style dalam tata tulis secara keseluruhan dan cara referensinya sist dalam level mengikuti APA Publication 6th Ed.

2. Ruang lingkup dan kedalaman pembahasan:

Artikel membahas tentang dinamika penyelesaian ekspatriat dari beragam negara terhadap budaya Indonesia. Tema penelitian ini cukup orisinal karena menjelaskan dinamika para ekspatriat yang terdapat dalam industri pendidikan. Isi artikel cukup lengkap dalam menjelaskan dinamika para ekspatriat yang bekerja dalam industri pendidikan. Isi artikel cukup lengkap dalam menjelaskan persoalan yang dialami, cara mengatasi gegar budaya dan pendekatan psikologi lintas budaya dalam menghadapi fenomena ini.

3. Kecukupan dan kemutakhiran data/informasi dan metodologi:

Data yang disajikan untuk artikel ini tergolong cukup memadai dengan melibatkan 5 ekspatriat yang berasal dari beragam negara digambarkan metode kualitatif mengisi kekosongan literatur perkembangan karir di Indonesia yang didominasi metode kuantitatif. orisinalitas artikel ini tergolong memadai mengingat jarang artikel membahas moderation level model yang melibatkan 1 variabel independen dan 2 variabel dependen. Turn it in Similarity Index: 13.0% dan 80% to referensi yang digurukannya merupakan lebih 10 tahun terakhir.

4. Kelengkapan unsur dan kualitas penerbit:

Artikel ini dimuat di jurnal internasional yang terindeks Scopus dan diterbitkan oleh UAD Press dengan kredibilitas yang baik.

Catatan Penilaian artikel oleh Reviewer :

1. Kesesuaian dan kelengkapan unsur isi jurnal:

Artikel ditulis sesuai dengan unsur artikel jurnal yang benar dengan pendekatan kualitatif. Unsur-unsur tersebut meliputi Title, Abstract, Introduction, Method, Results, Discussion, Conclusions, dan References. Title artikel ini diperkirakan dapat menggugah keinginan pembaca untuk mengikuti lebih jauh. Abstract yang disajikan efisien, lugas, dan sistematis. Introduction telah melakukan review terhadap perkembangan riset terbaru. Dalam bagian Method sesuai dengan metode dengan pendekatan kualitatif. Pada bagian Results memaparkan diskusi tiap kasus dari pengalaman partisipan penelitian, yaitu para ekspatriat dalam melakukan penyesuaian diri dengan budaya Indonesia. Pada bagian Discussion memaparkan hasil penelitian berupa dinamika psikologis para ekspatriat dalam upayanya menyesuaikan diri dengan budaya lokal ketika mereka harus bekerja di industri pendidikan di Indonesia. Penulisan daftar pustaka juga sudah sesuai kaidah penulisan ilmiah.

2. Ruang lingkup dan kedalaman pembahasan:

Tema yang diangkat dalam penelitian ini tergolong cukup orisinal karena menjelaskan dinamika psikologis strategi penyesuaian diri yang dilakukan para ekspatriat dari beragam negara terhadap budaya Indonesia. Namun, kekhususan partisipan yang bekerja di bidang pendidikan kurang nampak.

3. Kecukupan dan kemutakhiran data/informasi dan metodologi:

Partisipan yang terlibat dalam penelitian yang dilaporkan dalam artikel ini tergolong cukup memadai. Jumlah partisipan sebanyak 5 ekspatriat yang berasal dari beragam negara dirasa telah memberikan informasi yang komprehensif mengenai fenomena penyesuaian diri yang mereka alami. Pendekatan kualitatif tepat digunakan dalam penelitian ini dengan tujuan menggali penyesuaian diri partisipan dan konflik yang dialami, namun uraiannya kurang mendalam. Hasil cek plagiasi adalah 5% tergolong rendah. mayoritas referensi yang digunakan merupakan terbitan 10 tahun terakhir yang mutakhir dan adapula yang lebih

4. Kelengkapan unsur dan kualitas penerbit:

Artikel dipublikasikan dalam jurnal internasional yang terindeks Copernicus dan diterbitkan oleh UAD Press (Universitas Ahmad Dahlan Press). Unsur-unsur jurnal cukup lengkap, meliputi cover, editor board dan reviewer, daftar isi, dan artikel-artikel. Kredibilitas penerbit tergolong baik dan kualitas sangat memadai.

Abstract

This study describes the adaptation of the Child and Youth Resilience Measure-Revised (CYRM-R) for use in Indonesia. The process of adaptation involved several steps. The first step was translating and back-translating the measurement. The next step was conducting focus groups to explore the legibility of the translated measure. After this, the validity and the reliability of the translated version was tested, as well as an exploration of data. Samples were 130 elementary school children (57.7% female) aged 10-13. Data were collected in 2 randomly chosen elementary schools in Kota Bandung. The analyses confirmed the validity and reliability of the measure ($\alpha = .902$). The results indicated that the CYRM-R had been adapted successfully and is a robust measure for exploring the social-ecological resilience of children and youth in Indonesia. The CYRM-R can be used for research and practice in the Indonesian context.

Keywords: resilience; child; measurement; cross-cultural; CYRM-R; Indonesia

Introduction

Many Indonesians face adversity throughout their lives, occurring at many different levels, including psychological (e.g., the impact of parents divorcing, child-rearing difficulties, domestic violence, sexual violence), social (e.g., human trafficking, being bullied, poverty), and environmental (e.g., tsunamis, earthquakes). Several studies in Indonesia have explored resilience in cases of human trafficking victims (Borualogo, 2018), migrant youths (Borualogo, 2014), rape victims (Ghina & Suhana, 2016), and sexually abused boys (Tiarakusuma & Rosiana, 2016). Studies from around the world have indicated the value of understanding the protective factors that help individuals to thrive and do well despite these challenges. These resilience-related qualities such as embracing cultural values and having supportive peer relationships have been found to help those at risk, such as improving the mental health of street children in Durban, South Africa (Hills, Meyer-Weitz, Asante, 2016).

Adaptation of MacNew Heart Disease Health-Related Quality of Life Instrument in Indonesian Myocardial Infarction Patients

Abstract

Lack of adapted health-related quality of life measurement in Bahasa Indonesia may create difficulties in concluding the effects of heart disease and its treatment on a patient's health-related quality of life in Indonesia. MacNew heart disease health-related quality of life questionnaire (MacNew) has been proven a valid and reliable health-related quality of life measurement. It also has been adapted in several languages. This study aimed at translating and assessing the Indonesian version of MacNew questionnaire validity evidence based on the relation with other variables on and internal consistency. Validity evidence based on the relation with other variables was assessed by correlating the Indonesian version of the MacNew questionnaire score with cardiac anxiety, gender, age, education level, left ventricular ejection fraction score, and comorbidity. Two hundred thirty-six patients diagnosed with myocardial infarction (MI) filled out the questionnaire at a one-time intake. Results from confirmatory factor analysis revealed three domains of health-related quality of life, namely emotional, physical, and social. The three-domain explained 42.31% of the health-related quality of life total variance. The internal consistency of the questionnaire was good (0.816-0.900). Health-related quality of life was negatively correlated with cardiac anxiety. Male patients had a higher health-related quality of life compare to female patients. However, there was no significant correlation between health-related quality of life and left ventricular ejection fraction and comorbidity. The Indonesian version of MacNew questionnaire demonstrated satisfactory psychometric properties and can be recommended to measure HRQOL in heart patients in Indonesia.

Keywords: *Health-related quality of life, MacNew Heart Disease HRQOL instrument, instrument adaptation*
